Lego hidden side sets ranked

(Pocket-fluff) - Lego Hidden Side is a series of Lego sets that, as the name suggests, have a hidden element to them. No, it's not a minifig hidden in a closet, but virtual ghosts and ghouls that are only revealed when viewed via your smartphone. That's right, Lego has embraced the world of augmented reality and created a series of sets that come to life as long as you've got the right technology. The included app offers a variety of puzzles, the chance to see a virtual world, and when you can take the kit with you, the opportunity to continue playing on the go. There are two game modes, including Play as a Hunter mode, where the goal is to catch ghosts in competition against other players either online or in the same room, and a Play as a Ghost mode (coming 2020), where children can join two other online ghost players with the aim of haunting LEGO Hidden Side sets and hiding from a player-led ghost hunter. Here we explore Lego's Hidden Side range, what's available, and show the best prices to buy it. Legosquirrel_widget_172464All good ghostbusting stories have to have a laboratory where your distinguished professor can work from, and this is the starting point of the Hidden Side universe. Called J.B's Ghost Lab, it's an entry-level set that includes a few minifigs, a de-haunting chamber and symbolic pizza to munch on why you're working out what to do next. LegoThis's simple building buggy features springs to give the vehicle extra bounce, a mutant two headed haunted minifig, and a gasoline pump to fill up with gas. Legosquirrel_widget_172463Set in the fictional town of Newbury, this set features a shrimp boat, canoe and ghost crocodile. The shrimp boat divides in two and you get the two main characters in Hidden Side; Parker and Jack. In the augmented reality world, the boat floats on a lake. Legosquirrel_widget_172462This eerie set features a haunted tree and tomb that opens up to reveal a skeleton. In conjunction with the cemetery statues, new missions reveal in the app and with removable arms the tree can also come to life. LegoHaunted trees have strong in the hidden side, and this set allows you to create the gateway to the Hidden Page with creepy pages to boot. Legosquirrel_widget_172461If cemeteries and shrimp boat wrecks are all reminiscent of 1980 horror movies on the Maine coast, then you can opt for a more gasoline fueled experience with Stunt Truck. You actually get two vehicles in this set. A tricycle is the vehicle for a ghost, while the good guys can jump in the souped-up pickup truck complete with working cannon. Legosquirrel_widget_172460If you have a shrimp boat, use a shrimp hut to sell the catch. This set, which sits in the middle of the Hidden Side series, has a diner where you can play the ghost-catching games found in the included AR app. Legot 2019, El Fuego had a stunt car. In 2020, he'll have a Stunt Plane to steer. This 295 Lego piece set comes with three minifigs, including El Fuego And the Spencer ghost dog. LegoNewbury may be set in the countryside, but that hasn't stopped Lego from creating a city subway station for it, well we're not sure behind the logic either. Still, this Lego set comes complete with a haunted working minifig. Legosquirrel_widget_171550The most iconic Hidden Side set is the battle-ready school bus that features a slide-out ghost-hunting lab and a variety of minifigs, including occupied road workers and their monster toilet. As with the other sets, there is a boss ghost to find and defeat, and when you are not playing with the AR app you will enjoy driving your minifigs to school, imaginary or not. Legosquirrel_widget_172458Hogwarts have a train, so why not Newbury High? This Us express train sees the cab turning from innocent-looking trains to a glow in the dark monster train, but it also comes with a portable laboratory and mini platform waiting room to complete the set. But you'll need more Lego train tracks if you plan to take a trip anywhere. Legosquirrel_widget_172459The completely set hidden side range, this haunted high school set features 1,474 pieces, seven minifigs and a miniature ghost dog. The set switches to a huge obsessed school with a flick of a few contacts and a pull of a few handles and will entertain both with and without apps. Look around the back at the find you find the school includes a hidden chamber, bus station out front, computer lab, library, bathroom, chemistry room and bell tower. LegoAnother 2020 set, Haunted Fairground takes the premise that no horror story is truly complete without a clown, and that's exactly what this set delivers. It comes with fairground rides, five minifigs including for scary clowns to play with. LegoNew for 2020 and in accordance with the sea theme; why are so many of the 1980s horror movies going on in Maine or on the northeast coast of America? The Lighthouse of Darkness is a 540 Lego piece set with a lighthousekeeper, pier and a skeleton in the closet. There is a jet-ski included, but you just need to know that this would and wrecked Shrimp Boat set would make a perfect match. The new Legoland in New York will have an AR trick up its sleeve Writing by Stuart Miles. There are 17495 items in the Brickset database.
